LIFESTYLE COLOURS FOR AUSTRALIA

The logo features a stylized figure of a person with arms outstretched, positioned above the text 'AKZO NOBEL' in a bold, sans-serif font.

AKZO NOBEL

Interpon D610

DURABLE POWDER COATINGS FOR RESIDENTIAL AND LIGHT COMMERCIAL PROJECTS

Practical, durable use of colour for award-winning designs

The latest lifestyle colour selections from **Interpon** Powder Coatings have been specifically chosen to meet with today's colour trends. Considering colour is a vital part of everyday living, the Lifestyle Colours for Australia collection allows you to create an environment that reflects your lifestyle and individuality.

Being combined with the comprehensive **Interpon D610** Bronze Global Warranty* that offers guaranteed colour and film performance on the building, makes the **Interpon D610** colour options perfect for residential and light commercial applications.

World's largest coatings company investing locally for over 25 years

Using the latest technologies to meet the specific conditions of the harsh Australian climate, Akzo Nobel develops powder coatings under the **Interpon** Powder Coatings brand that are the first choice for many leading aluminium manufacturers and fabricators in Australasia.

All powder coatings manufactured locally by Akzo Nobel are lead-free and do not contain TGIC or other solvents, creating products both friendly to the environment as well as for those working with them. We constantly strive to exceed international safety standards. As part of our commitment to environmentally sustainable development, Akzo Nobel have introduced Product Stewardship management systems into all businesses to assist us in the management of the environmental impact of our products throughout the development process and product lifecycle.

Interpon D610 Powder Coatings

Lifestyle Colours for Australia features **Interpon D610** powder coatings that give performance and durability for residential and light commercial applications, where:

- ▲ A Bronze Global Warranty* meets the needs of the client.
- ▲ The construction is no more than three levels above ground.
- ▲ The construction is more than 100 metres from any salt water or surf line.
- ▲ The colour used is displayed in the **Interpon D610** colour offer or alternatively where Akzo Nobel have agreed to issue a warranty for a specially matched colour.
- ▲ Meeting the performance criteria of AAMA2603-05, AS3715-2002, BS6496-1984 and Qualicoat Class 1.5 is required.

*Conditions apply to the **Interpon D610** Bronze Global Warranty. A sample copy of the warranty is available upon request.

Colour Freedom

The **Interpon D610** colour range gives you the freedom to create exactly the look you want using a variety of natural and subtle colours to blend into the environment, bold colours to enhance a modern lifestyle, colours to coordinate with COLORBOND® steel as well as a selection of textured finishes. The **Interpon Anodic™** Originals are an excellent powder coating alternative to anodised aluminium, giving you modern good looks with the durability and finish of a powder coating.

For those times when only a specially designed colour will do, take advantage of the **Interpon MiniB™** option that gives you fast service on small batch made-to-order colours of your choice. Some conditions do apply such as minimum batch size, choice of colour and product so please contact the **Interpon** Customer Care Team for additional advice.

How to Specify

Once you have chosen **Interpon** Powder Coatings for your project, it is important that the correct product is used. Specifying **Interpon** Powder Coatings is easy. Simply nominate the product type, colour, finish and product code in your specification. For example, **Interpon D610 Anodic™** Natural Matt MY235A.

For the warranty to apply, the product must be applied by an **Interpon D** Approved Applicator. Certain locations also require that specific product types be used. Please contact the **Interpon** Customer Care Team for additional specification support and advice.

WORLD LEADER IN POWDER COATINGS

Broad product range to suit every project

In addition to the **Interpon D610** range, the **Interpon D2010**, **Interpon D2015 Ultriva™** and **Interpon D3000 Fluoromax®** ranges offer quality powder coating for a multitude of projects, including high-end residential, commercial and prestigious commercial projects. The *Product End Use Table* below helps you match suitability with project and includes the 'on building' performance warranty.

Product End Use Table

Product	Interpon D Global Warranty*	Film Integrity	Colour Integrity	Recommended End Use	Typical Specifications**
Interpon D610	 BRONZE	10 Year	7 Year	Residential and Light Commercial to 3 Levels; and more than 100 metres from any salt water or surf line	AAMA2603-05, AS3715-2002, BS6496-1984, Qualicoat Class 1.5
Interpon D2010	 SILVER	10 Year	10 Year	Commercial Prominent and Coastal	Meets AAMA2604-05
Interpon D2015 Ultriva™	 GOLD	15 Year	15 Year	Residential and Commercial. Prestigious and Coastal	Exceeds AAMA2604-05
Interpon D3000 Fluoromax®	 PLATINUM	20 Year	20 Year	Commercial Monumental and Coastal	Meets AAMA2605-05

*Conditions apply to warranty. A sample copy of the warranty is available upon request. **Performance may vary slightly between individual products.

Disclaimer

Unless otherwise agreed by us in writing, any contract to purchase products referred to in this colour card and any advice which we give in connection with the supply of products are subject to our standard conditions of sale. Typical end uses for **Interpon** products are displayed in this publication using actual projects and representative images.

Interpon® and **Fluoromax®** are registered trademarks of Akzo Nobel International BV. **Ultriva™**, **Excel™**, **Vivica™** and **MiniB™** are trademarks of Akzo Nobel Pty Limited.

COLORBOND® and ® colour names are registered trademarks of BlueScope Steel Limited. ™ colour names are trademarks of BlueScope Steel Limited. # Over time performance may vary between COLORBOND® steel and **Interpon** Powder Coatings due to the different paint technologies used.

Interpon D Approved Applicators

Akzo Nobel has developed the **Interpon D** Approved Applicators Network to support the **Interpon D** Global Warranty Program. This is designed to make sure that the **Interpon** powder coating that you choose is applied correctly and meets **Interpon** Powder Coatings warranty requirements, as well as current local and international standards.

Care and Maintenance

Keeping your powder coated products free from pollutants and environmental contaminants retains their good looks and ensures long lasting performance. This is especially true where the surface is in a protected area that doesn't benefit from the natural cleaning properties of rainwater.

Regular washing with a soft brush and a diluted solution of mild liquid detergent, followed by a fresh water rinse, will remove substances such as airborne salts and pollutants that are detrimental to your powder coated products. In rural or normal urban environments cleaning should occur every 12 months. In areas of high pollution such as industrial or geothermal areas, cleaning should occur every three months. In particularly hazardous and coastal locations the frequency of cleaning should be increased to monthly.

It's important to note that harsh chemicals and solvents can be extremely harmful to a powder coated surface and their use is not recommended. Prior to the use of any cleaning agent a small non-visible area of the powder coated product should be tested in a non-visible area to ensure that no visual damage will occur, particularly with bright and deep colours. The use of any cleaning agent should be carried out in the shade and during cooler temperatures using a soft cloth and gentle wiping only.

Interpon is your partner in success

Interpon Powder Coatings has a range of materials and resources to help you succeed with your project – from the selection of product, coordination of colour, meeting of project specifications, choosing a suitable applicator, right through to ongoing care and maintenance. The **Interpon** Customer Care Team is ready and willing to assist with your next project.

ULTRA DURABLE POWDER COATINGS FOR LONG LIFE DECORATION AND PROTECTION

Interpon D2015

Gold Global Warranty

Based on a unique new generation of ultra durable polymers developed and manufactured in-house by Akzo Nobel, **Interpon D2015 Ultriva™** powder coatings offer ultra durability and peace of mind to the end user.

Interpon D2015 Ultriva™ is perfect for all residential and commercial prestigious buildings and high rise developments where long term optimum architectural, aesthetic, technical and economic performance is required.

A 15 Year Gold Global Warranty supports **Interpon D2015 Ultriva™** when applied to aluminium by an **Interpon D** Approved Applicator. This new generation of architectural products is based on technology that has been engineered to resist attack by the elements of weathering.

Recommended Uses

Interpon D2015 Ultriva™ is recommended for exterior use in high Ultra Violet, high humidity and coastal marine environments where ultra durable coating performance is required.

Typical end uses include aluminium curtain wall extrusions and panels, architectural window and door systems, balustrading, louvre systems and other fabricated architectural aluminium sections.

Interpon D2015 Ultriva™

ULTRA DURABLE POWDER COATINGS FOR LONG LIFE DECORATION AND PROTECTION

World's Largest Coatings Company

Akzo Nobel, the manufacturer and marketer of **Interpon** Powder Coatings is the world's largest supplier of paint and powder coatings. This position is achieved through an understanding of customer needs and the common goal of delighting customers with the supply of high quality products and value added services.

Interpon Powder Coatings is a preferred choice for some of Australasia's leading fabricators when it comes to protecting and decorating architectural aluminium. This includes aluminium joinery manufacturers, aluminium extruders, curtain wall fabricators and professional aluminium powder coaters.

Local and Global Performance Specifications

Interpon Powder Coatings recognises the importance of local and international performance specifications. Interpon offers a range of architectural powder coatings that are marketed under the **Interpon D** banner and are specifically formulated to meet and or exceed the criteria of these specifications.

Approved Applicator Network for Peace of Mind

Supporting the Warranty Program is the **Interpon D** Approved Applicator network, designed to ensure that the **Interpon** powder coating specified is applied in accordance with the specialised requirements of both **Interpon** Powder Coatings and relevant international standards. **Interpon** Powder Coatings undertakes an extensive evaluation process and only issues approval to applicators who demonstrate they meet the criteria of the **Interpon D** Approved Applicator System. This is to ensure the highest level of customer satisfaction possible.

Interpon D Global Performance Warranties

The architectural range of **Interpon** powder coatings has been classified by a distinctive 4-tier colour coding system to reflect the duration of the Warranty available. The **Interpon D** Global Warranty Program makes product selection extremely easy.

Product	Interpon D Global Warranty**	Film Integrity	Colour Integrity

Interpon D2010	SILVER	10 Year	10 Year
Interpon D2015 Ultriva™	GOLD	15 Year	15 Year
Interpon D3000 Fluoromax®	PLATINUM	20 Year	20 Year

**Conditions apply to warranty. A sample copy of the warranty is available upon request.

Interpon MiniB™

Interpon MiniB™ is a new small batch and rapid delivery service exclusive to **Interpon** Powder Coatings. This service provides specially made products to an order size as small as 60 kgs in almost any colour and almost any finish from a selection of technologies. Most importantly **Interpon MiniB™** provides this service very quickly and very economically. **Interpon MiniB™** is ideal for projects where only a specially designed colour will satisfy the design and creative needs of the project.

Interpon – Your Partner in Success

Interpon Powder Coatings has a range of materials and resources to help you succeed with your project – from the selection of product, coordination of colour, meeting of project specifications, choosing a suitable applicator right through to ongoing care and maintenance. The Customer Care Team at **Interpon** Powder Coatings is ready and willing to assist with your next project.
